

Research for Universal Design Guideline Development of Seoul welfare facilities

■ Background and Purpose

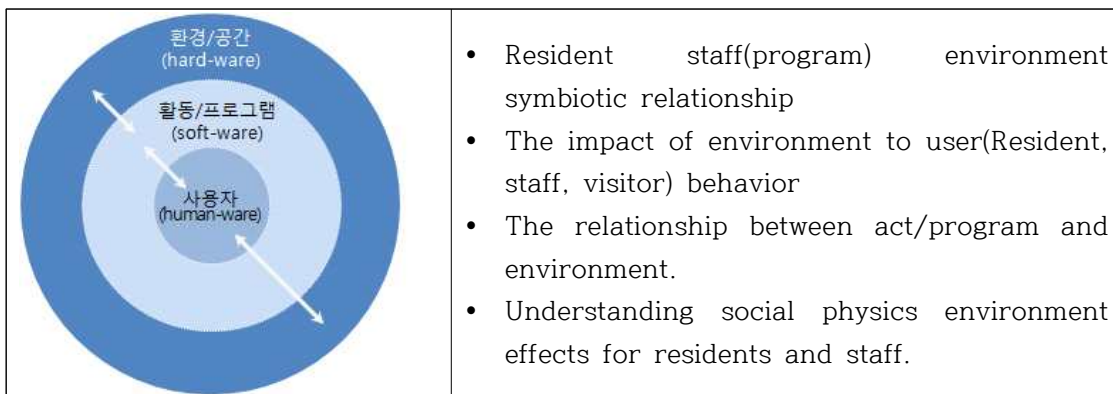

- Korea needs policies and systems for the socially disadvantaged persons because of aging, low fertility phenomenon.
- In addition, adequate space environment is required for them.
- Seoul has implemented Universal Design as a design policy for variety of users, including the young and the old in order to provide adequate space. Seoul City also developed design guideline to execute it into real life.

■ Research Methods

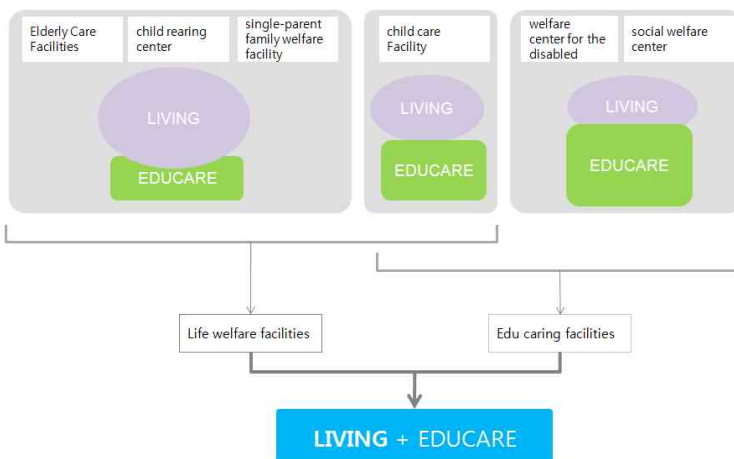

- Through various literature search, surveys, visits and expert advice, we has developed customized guidelines for each facility.

■ Research and Analysis

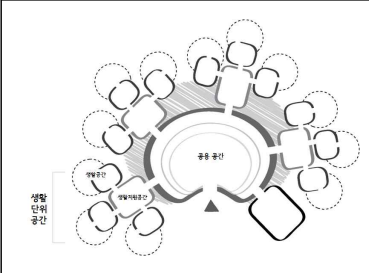

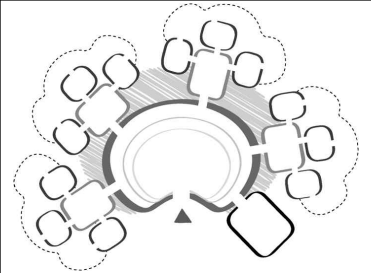

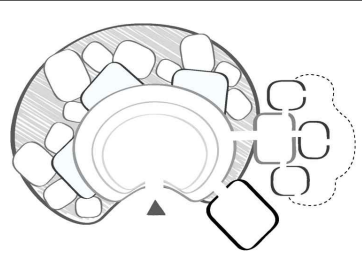

1. Setting the analysis standard based on case studies

2. Characteristics of space configuration for each facilities.

- Space concept

Space concept	Life welfare facilities	Edu caring facilities.
		

■ Results

- The concept of universal design of Seoul welfare facilities.

- Outputs

Elderly care Facility	Day care center for the elderly	child rearing center	child care Facility	welfare center for the disabled	social welfare center	single-parent family welfare facility
